Part-time study, first year

2008 – 2010

Slovak Technical University, Bratislava, Faculty of Electrical Engineering and Computer Science

Department: applied IT

Full-time study, second year

2003 – 2007

Leonard Stöckel High School, Bardejov

Other skills, interests:

Thanks to long-lasting interest in writing and literature (mostly fiction) I have closer relation to people, whose points of interest are different from ordinary IT oriented ones. Patience and developed vocabulary make it easier for me to talk with this kind of people and make from me an ideal person who stands among IT sphere and custom user.

In free time I usually work on many other things I have interests in. I compose songs, continually write my own novel book and when it's nice outside, I go out with skates or bicycle. And of course I tend to stay in touch with newest trends in webdesign, following a couple of trustworthy sources.
